**Happy Father's Day to All the Dads
and Father Figures**

Today, we raise a toast to every father who fills our lives with guidance, warmth, and a little bit of fun. Whether you're a dad by blood, stepdad, adoptive father, or a mentor who's stepped in along the way, your love and support make all the difference. Your steady presence in our lives—be it through words of wisdom, endless encouragement, or the comfort of knowing you're always there—shapes our world in ways both big and small.

We celebrate the moments of laughter you spark, the quiet strength you offer, and the gentle reassurance you provide during life's ups and downs. Every little gesture, every story shared, and every lesson taught helps build a legacy of love and resilience that lasts a lifetime. Today is about sharing that gratitude and honor for all the incredible fathers whose love lights our way.

HAPPY JUNE 19th

Happy Juneteenth, also known as Freedom Day, on the anniversary of the Emancipation Proclamation

that abolished slavery in Texas, along with other former Confederate states in 1865. The first celebration occurred in Galveston, Texas, in 1866. Rapidly became popular across many States in the nation, later becoming known as:

Juneteenth National Independence Day.

MEMORIAL DAY

MEMORIAL DAY MAY 26TH.. This day invites us not only to mourn the losses but to celebrate the resilience embodied by those who continue to support our community with quiet fortitude. Every act of remembrance strengthens the fabric of our society, urging us to preserve the memory of heroism and to invest in a future that upholds the values for which they stood. Our commemorations—whether through ceremonies, community gatherings, or personal reflection—are a testament to the ripple effects of their sacrifice, echoing through time and across generations.

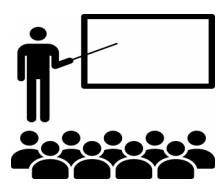

WHEN FLYING TO HIGH ALT AIRPORTS

As the temps rise over 90 degrees, engines will run hot. So if you see oil temp rising, level off and gain some speed. Continue to climb when the oil temp has dropped a little bit. We call this "stair-step climbing". Remember, you have to lean at these higher temperatures and altitudes. The fuel/air mixture will be too rich for the density altitude, on the ground as well as in the air. It is not uncommon for the density altitude at KAPV to be 6,000 ft. and at Big Bear, 9,000 ft.+

No more than 2 people and HALF tanks in the Cessna 172 or Piper Warrior to Big Bear or ANY high altitude airport.

Any questions, ask Midfield staff/Mgt.

=====

**PRIVATE PILOT
GROUND CLASSES
SPRING/SUMMER 2025**

Is in full swing, not too late to hop into classes now!

DATES: MAY 14TH THRU JULY 17TH
TIME: 6pm-9pm
WHERE: APV Main Terminal
(conference room—21600 Corwin Rd)

PER CLASS: CLUB \$35.00
NON-CLUB: \$45.00

Call or come by to enroll and pay for any class you want to attend in advance.

**welcome
NEW MEMBERS**

Michael Yoshino, Mia Orozco,
