MONDAY THRU FRIDAY ....7AM - 5PM  
SATURDAYS.....7AM - 3PM / 5PM  
CLOSED ON SUNDAYS

## FRAGILE AIRCRAFT PARTS

Single engine aircraft are made with light-weight, delicate materials. When boarding or exiting the planes, DO NOT bear your weight to support or brace yourself.

They are subject to breaking with even minor force or weight upon them.

These types of incidents can result in student OR

CFI being required to pay for such damages. Lesser damages (under \$2,500) will be paid in full by student or CFI.

For major damages, our insurance deductible is \$2,500.00 for any claims submitted. The student or CFI will be required to pay the deductible.

+++++

**LOW AIR IN TIRES**

During a pre-flight, you suddenly discover a **LOW TIRE**. **PLEASE** notify Patrick or Robbie to get it aired up.

**OR**, you may choose to fly another aircraft, (subject to availability) if no technician assistance is available.

**IF You and/or CFI choose to take aircraft up for a flight, when you go to land, it will punch the tube and damage the tire.**

***This repair will be charged to CFI or student.***

Please make safe & wise choices, to avoid unnecessary charges for repairs.

**KEEPING AIRCRAFT CLEAN**

AT THE END OF EVERY FLIGHT, BE SURE TO GATHER YOUR PERSONAL BELONGINGS, ANY TRASH ACCUMULATED DURING YOUR RENTAL.

**WATCH THOSE OIL LEVELS**

**737EC/739HZ Lycoming engine model H—**  
Oil levels should be at a **minimum of 4qts.** Flights over 1.5 hours or cross country, 5 qts. would be ideal. **MAX** capacity 6qts.\*\*

**30378/42126 Lycoming** oil levels should be between 5 & 6 qts. Flights over 2 hours or a cross country 6 qts. is ideal. **MAX** capacity 8 qts.\*\*

**\*\*DO NOT operate Any aircraft at MAX levels.**

*Got Questions?*

*Ask a CFI or Midfield Technicians about the specifics.*
