Welcome to the BEST season of the year for Southern California's blooming bounty of beauty. A showcase of colorful fields of flowers blanketing the rolling hillsides and valleys throughout Southern California. A fabulous experience to be seen by air. Rent an aircraft, take a friend or a special someone and fly over any of these beautiful regions of glorious blooms! Best times for viewing are early on a calm and sunny morning. Overly windy conditions tend to cause blooms to close up.

- ♥ Antelope Valley Poppy Reserve
- ♥ Anza Borrego Desert State Park
- ♥ Flower Fields – Carlsbad, CA
- ♥ Mojave National Preserve
- ♥ Placerita Canyon Nature Center

ATTENTION PILOTS!! BFR TIME?? SIGN UP NOW!!

 Upon minimum pilot requirement met. We anticipate the class being held in late April or early May 2025

\$30 —Club Members
\$40—Non-Club members

CELEBRATION OF EASTER IS APRIL 20TH

CELEBRATE EARTH DAY APRIL 22ND

AIRCRAFT HAVE RIGHT-OF-WAY AT AIRPORT

When you approach the taxiway, it is imperative for safety reasons, to **STOP, LOOK** and remain **Out-of-Way** of all aircraft. When driving on airport grounds, you need to comply with the posted **SPEED LIMITS**. Folks who recklessly drive on airport property, put others at risk. PLEASE OBSERVE AND COMPLY TO ALL SIGNS POSTED!

CHECK AIRPORT SERVICES BEFORE YOU GO

When planning your flights to any other airports, check for **NOTAMS, TFRs and airport services at Flight Service Stations**. You can access FSS through

→ **WEBSITE: www.1800wxbrief.com**

→ **PHONE: 1-800-WX-BRIEF**

CHECK FOR AIR PRESSURE

Blown tires are typically caused by landing on tires that are under inflated or by "braking" too much; causing a hole in the tire. The time to change tire for sure is when the "white" cord is showing. When in doubt, ask CFI or mechanic.

CHECK FOR BIRD NESTS

TAKE A CLOSE LOOK— when performing your pre-flight inspections for possible bird nests as they are actively building! Nests can cause a fire in the engine if not discovered & removed. If you discover one, check with Midfield for assistance with removal.

PITOT COVERS

Bug season is here!! Students & pilots, **ALWAYS REMOVE the pitot cover BEFORE each flight**. If pitot is left on, your airspeed will read zero. **BE SURE to put the pitot covers ON at THE END of every flight**. If the pitot gets clogged with debris or bugs, it will affect your air speed. Never blow into the tube, as it will damage the instruments inside.

NEW CLUB MEMBERS

Oscar Rivera, Roger Terrazas, Michael Grandy

PASSED PRIVATE PILOT CHECKRIDE
